Hi all,

Here is what DRMS provided me. If you look at the viewer, DRMS location is downstream of our current location. I believe we were going to use our location coordinates, but it's been a LONG week since we discussed.

Liz, do you remember what we decided to do with this station?

Hi Dan,

I was just working on the Animas SAP and had a question about the A07B location that was highlighted on the most recent table. I was wondering where DRMS has the location. Ryan checked through all our records and everything we have matches what is on the table currently. Do we want to use the DRMS location and if so do you have those coordinates?

Thanks!

Leslie Christner
